

## D1 IRON

### **Description:**

D1 is a neutral detergent that decontaminates rims, car body and glass from iron residues, rust and oxide. Its strong formula attacks the iron micro particles and changes colour, becoming purple, but without affecting the bodywork and plastic parts. It is an essential product to prepare surfaces for polishing or coating.

### **Directions for use:**

use it pure to treat surfaces that show rust or heavy contamination. Wait for the product to react and change colour into purple (2-5 minutes) and rinse with plenty of water.

**To treat surfaces that are contaminated only by iron particles:** dilute in a ratio of 1:1 or 1:2 (1 part of product and 1 or 2 parts of water) and apply on the previously washed surface, following the instructions for use indicated above.

**Warning:** do not apply on hot surfaces and do not allow it to dry.

### **Consumption:**

150ml/car

### **Technical Features:**

Appearance and colour: slightly lilac

Odour: characteristic

pH: 7,0 ± 0,5

Flash point: >100°C

Relative density: 1,12 g/cm<sup>3</sup>

Solubility in water: soluble

Solubility in oil: not soluble

### **Storage:**

Unopened and stored at room temperature away from direct sunlight.

### **Packaging:**
