CLAY BAR

The Innovacar Clay Bars by Fra-ber are 3 types of clay bar (soft, medium and strong) of 100gr each, suitable for mechanical decontamination of cars.

Their weight and elasticity allow its easy manual handling and they are sold in small plastic boxes so that they can be stored and reused. They remove traffic film; insect, resin, and iron residues and all impurities on the car. The product is suitable for both painted and chromed surfaces.

PACKAGING

Clay bar blue soft - 100gr 1pcs.
Clay bar yellow medium - 100gr 1pcs.
Clay bar red forte - 100gr 1pcs.

ITEM CODE

79197
79612

ACCESSORIES

CLAY MITT

DECONTAMINATING CLAY MITT.

The Clay Mitt of the Innovacar line by Fra-Ber is a decontaminating glove to be used during the decontamination stages typical of detailing and provides an alternative and more advanced solution compared to the classic clay bar, as it can be used far more often. It is easy to use and lets you reach even the most difficult areas of cars that clay bars cannot reach. The glove has a side made with a clayey material that, combined with a lubricant like DL Lube, provides the same function of clay bars and therefore acts as a decontaminating product, while the other side is entirely in microfibre and is used for the removal and rinsing steps. Basically two products in one!

PACKAGING
1 pcs. - 13,5×21 cm

ITEM CODE
79614

MICRON BUFFING

SUPER-ABSORBENT MICROFIBRE CLOTH FOR FINISHING AND DRYING.

This cloth is suitable for the finishing detailing of waxes, sealants, protective sprays and quick detailers and sprays. Its extra softness, ultrasonic cut and seamless edges make it safe to use on even the most delicate surfaces.

Both sides have the same characteristics of thickness and softness, offering the same results.

This cloth is made of a highly absorbent fibre that also helps simplify and speed up drying after car washing.

Quickly absorbs large amounts of water, sliding quickly over surfaces without leaving streaks or stains.

PACKAGING
1 pcs. - 60×40 cm - 550 gsm

ITEM CODE
79515

ACCESSORIES

WHITE SPONGE

DIRT REMOVAL SPONGE.

Special sponge for the quick removal of dirt on all types of surfaces without the use of aggressive detergents.

PACKAGING
10 pcs. - 11x6x4 cm

ITEM CODE
79543

FOAM APP BLOCK

NANO COATING APPLICATOR.

Manual detailer applicator specially designed for the application of nanotechnological treatments.

This coating applicator has been made with a double density with a dense handle for use without getting dirty, for precise work on surfaces and with a soft underlying part for use. The applicator is typically used by wrapping a small microfibre around it (we recommend Micron Suede 10x10cm) for quick and safe product application.

PACKAGING
20 pcs. - 9x4x2.5 cm

ITEM CODE
79475

ACCESSORIES

MICRON XXL

SUPER-ABSORBENT MICROFIBRE CLOTH FOR DRYING.

This cloth has been made with a highly absorbent fibre that simplifies and speeds up drying after car washing. Quickly absorbs large amounts of water, sliding quickly over surfaces without leaving streaks or stains. Extremely delicate and safe thanks to its silk edge. Its large size makes it perfect for drying even the broadest surfaces.

PACKAGING
1 pcs. - 70×90 cm - 500 gsm

ITEM CODE
79466

MICRON UP

MICROFIBRE CLOTH FOR THE REMOVAL OF PRODUCT RESIDUE.

This short fibre cloth has been designed to remove polish, compound and coating. It quickly eliminates residue left from products during polishing. The laser cut technology allows you to use it safely without leaving surface defects since the product is seamless and edgeless.

It can also be used with spray products for cleaning leather/dashboards/door panels but also for metal polish. Gentleness and cleaning capability in a single product.

PACKAGING
1 pcs. - 40×40 cm - 300 gsm

ITEM CODE
79470

ACCESSORIES

DET BOWL

MOVABLE BUCKETS FOR WASHING AND RINSING.

Det Bowls wash and rinse are two buckets that are useful during detailing treatments and also for traditional vehicle washing. Using them both allows for excellent organisation, as it is very important to keep washing water contaminated by dirt separate from rinsing water. The two buckets also have a grille inside them to allow any residuals to settle on the bottom without bringing them back to the surface, thus preventing them from being "collected" again each time the mitt or the cloth used is soaked. Including: "wash" and "rinse" labels to be applied on each basket, black grid guard and black cover.

PACKAGING
1 pcs. - 20lt. format

ITEM CODE
79472

MICRON SUEDE

SUEDE MICROFIBRE CLOTH FOR NANOTECHNOLOGICAL COATING APPLICATION.

A microfibre suitable for applying the nanotechnological coating or treatments typical of detailing, because it absorbs little product and spreads evenly. Its ultra soft, "edgeless" finish allows for homogeneous and regular application, guaranteeing safe use without marks or scratches.

*The small version 10x10cm has been specially designed to be wrapped on the manual applicator (we recommend Foam app block), a technique often used in coating.

PACKAGING
10 pcs. - 10x10 cm - 200 gsm
1 pcs. - 40 x 40 cm - 200 gsm

MICRON WASH MITT

MICROFIBRE MITT FOR WASHING.

Double-sided microfibre mitt for the washing phase of detailing. The special microfibre and polyester filaments of this high performance mitt capture dirt safely, giving a lubricated and smooth effect, releasing it once the mitt is immersed in a bucket. In addition, its sponge thickness offers high water absorption, essential during this phase. To prevent damage, this mitt is ideal for use with the aid of large buckets (we recommend Det Bowl) and with a grille on the bottom to avoid leaving residues in the microfibre that would cause damage to the surface.

PACKAGING
1 pcs. - 18X27 cm

ITEM CODE
79469

ACCESSORIES

WOOL WASH MITT LONG

LONG-HAIRED WOOL MITT FOR WASHING.

Innovative natural fibre mitts that guarantee safety, softness and comfort.

The wool mitt slides over the surface, safely collecting dirt particles and giving a more lubricated, smooth effect. Moreover, the back pocket has been specially designed to use the mitt manually and better and more meticulously manage surface work.

PACKAGING
1 pcs. - 250x160mm

ITEM CODE
79465

WOOL WASH MITT

WOOL MITT FOR WASHING.

Extremely soft and delicate short-haired wool mitt, medium-sized to fit perfectly in all vehicle inlets and curves. Provided with a separate thumb which helps in washing door handles without the use of brushes or smaller mitts.

Short-haired, delicate and absorbent. Ideal for use with the aid of large buckets (we recommend Det Bowl) and with a grille on the bottom to prevent leaving residues in the wool for washes in progress or future washes.

PACKAGING
1 pcs. - 300x200mm

ITEM CODE
79464

ACCESSORIES

MICRON APP

MANUAL MICROFIBRE APPLICATOR FOR POLISHES OR LIQUID PRODUCTS.

Practical tool for the application of polishing and liquid products typical of detailing (glaze, waxes, sealants).

The foam inside is absorbent and the outer microfibre is suitable for delicate surfaces with scratches. Moreover, the back pocket has been specially designed to use the manual applicator and better and more meticulously manage surface work. Suitable for interiors.

PACKAGING

1 pcs. - Ø 13 cm - Thickness 2 cm

ITEM CODE

79467

MICRON 2FACE

SHORT AND LONG PILE MICROFIBRE CLOTH FOR MAXIMUM FINISH.

Two-sided with two fibre lengths: The short pile side is suitable for cleaning, application and removal of sealants, waxes, sprays and quick detailers, while the long pile side is delicate for maximum finish.

It is edgeless and produced with laser-cut technology for guaranteed safe use.

Without a doubt the Fra-Ber microfibre when it comes to removing polishing pastes or oily residues.

DOUBLE LIFE

24-liter sprayer with coated, epoxy plastic lined tank. What is the difference, then, from a regular tank? Thanks to the plastic layer on the internal lining of the sprayer tank, the same canister is safely insulated and the contained chemicals in the detergent are never in contact with the tank surface, this preventing it from oxidizing and rusting. What are the advantages? The tank lasts twice as long as traditional tanks.

The detergent does not undergo any alteration due to oxidization and/or rust.
